Support From:

San Diego Unified
[Educational Technology and IT](#)

"What good is it for kids to graduate in 2006 from a school system that was designed for 1956?"

- Bill Gates

Educators, policymakers and business leaders need to embrace a vision that embeds 21st century skills into every aspect of education."

- Partnership of 21st Century Skills Dept. of US Education

"Today's learners are not the ones our systems (and teachers) were designed and trained to teach."

- Marc Prensky is internationally acclaimed. He is a former high school teacher.

Our Values and Vision

Project Light Speed. A collaborative vision of digital age reform that will transform education and engage students.

Vision. Create a learning community of passionate lifelong learners.

Mission. *Engage, Empower, Educate and Prepare* all students for the 21st Century and global economy.

Values. Foster an engaging learning experience to meet the diverse needs of all students.

Message from our Principals

Bobbie Samilson, Principal Point Loma High School. "Light Speed is not a technology initiative...it is about engaged student learning and developing the information literacy skills our students will need for the 21st century".

Linda Taggart, Principal, Correia Middle School. "We need to move beyond the 4 corners of the classroom and create an empowering, real time learning environment for all students.

Diane Ryan, Principal Dana Middle School. "The 150 year old educational delivery system no longer meets the needs of today's student....innovation in education is imperative".
